

## Hosting Cold Weather Oil Containment and Recovery Spill Response Training.

**Sign up is limited to 20 participants so act now!**

# Cold Weather Compliance Training

**1 Day / 8 Hours**

Course teaches the basic skills required to properly plan for, respond to, and clean up oil/petroleum products spills in the most adverse weather conditions— cold weather environments.

Emphasis is placed on cold weather personal protective clothing, response strategies and techniques to be utilized in the proper selection of response equipment and manpower for oil spill containment, recovery, and cleanup in snow and ice environments.

Eight hours of classroom instruction and hands-on ice and snow field exercises are conducted over one day. Field exercises include various ice slotting techniques, surface removal techniques, and cold weather decontamination procedures.

### Course Contents:

- Cold and Frozen Water Oil Spills
- Cold Weather Oil Spill Response PPE
- Ice Characteristics
- Source Containment Techniques
- Moving Ice - Spill Response Containment
- In situ Burning - Ice and Snow Applications
- Surface and Subsurface Oil Removal
- Spill Trajectory Analysis - Ice and Snow
- Decontamination - Cold Weather Operations

### Field Exercises:

- Ice Slotting Exercises
- Ice/Snow Decontamination
- Surface Removal Techniques (Skimmers, Augers, Chainsaws)
